Gladiolus "Opalescent"

RALPH M. SPEELMON

Telephone Garfield 6932

800 N.E. 22nd Street

Portland, Oregon

Please Read Every Word of This

The bulbs of choice old and new varieties of gladiolus offered herein are of best quality pure stock. My customers speak highly of them and their product. They are winners.

When a grower boasts that his bulbs are the BEST in the world he's—well, advertising. Oregon grown bulbs are hard to beat, and mine are all grown in Oregon. Scabby stock is a rare thing and when found is burned, NOT SOLD. Here are a few pleasant words for my stock:

"They were mighty fine," R. G. Smith, Portland.

"Not a rogue among them," S. B. Hunt, New York.

C. W. Thacker, Michigan, speaks highly of the quality of the bulbs and their product. See what he says about SACAJAWEA.

The gladiolus is not as widely known or grown as it should be. No other flower has such a wide range of tints, colors and color combinations. Most of them are unexcelled for cut flowers and decorative work. Others are better adapted for landscape uses.

To encourage more extensive planting my stock is offered at unusually attractive prices for the retail trade. Moreover I don't skimp on the count. Shipments will be prepaid at these prices to any address where parcels post goes in the United States, its territories, and Canada. Canadian customers must not fail to secure import permit, file it with their Collector of Customs, and advise me its number.

Plant them in liberal quantities in the spring as soon as danger of freezing is past. Cover about three inches in heavy soils, deeper in light and sandy soils. Water well about once a week and cultivate as soon as possible afterwards.

TERMS: Cash with order. Minimum mail order \$1.00. All orders accepted subject to prior sale. Better order early and avoid disappointments.

Give me the names and addresses of your flower-growing friends and I will put some good extras in with your order.

Unless otherwise designated bulbs are $1\frac{1}{4}$ inches in diameter or larger; medium sizes are about $\frac{3}{4}$ inches in diameter.

Initials or names of originators usually appear after the names of the varieties: Kunderd (K), Diener (D), etc.

COLLECTIONS.

I do not find satisfaction in a dealer's combination offer if it includes varieties already in my collection or varieties that I am acquainted with and do not care for. Perhaps you feel the same way. Therefore make your own selections from the list and, in addition to the usual extras,

Sacajawea

The new velvety red gladiolus with golden bronze overcast. Originated in Portland by Dr. Geo. B. Pratt of Bengal Tiger fame.

Large Bulbs \$5.00 each. Three, \$12.50.

Limited three to a purchaser.

No planting stock or bulblets offered this year. The price will remain the same for three seasons.

THE NAME.

Sac-a-ja-wea (Bird Woman) was the Shoshone Indian wife of a French-Canadian fur trader who had found her with the Sioux. They were living with the friendly Mandans near the site of Bismarck, N. D., when Lewis and Clark reached that point on their expedition to the Pacific. Sacajawea was anxious to see her own people again and, accompanied by her husband, became the guide for the expedition from the upper tributaries of the Missouri across the Rockies. She was memorialized at the Lewis and Clark Exposition at Portland, in 1905, by an attractive statue in bronze, which now graces Washington Park.

THE COLOR.

The originator calls it "velvety Indian red"; that is the foundation color. G. W. Thacker, in his catalog, calls it a "real golden bronze"; that is the overcast. Under artificial light, or viewed from a room against the light, the foundation color is more apparent, and is softened and enriched.

SACAJAWEA'S DEBUT.

A year ago only about a dozen so-called blooming size bulbs existed. These were all sent to Mr. John C. Davis for planting in the American Gladiolus Society exhibition gardens at Rochester, N. Y. The season was backward, and Sacajawea, being a mid-season bloomer, missed the national show. It attracted so much favorable attention that Mr. Davis became a big booster for it. A No. 4 bulb was sent to Mr. G. W. Thacker, LeRoy, Michigan, president Michigan State Gladiolus Society, for trial. Fortunately this one bloomed just in time for the Michigan show at Lansing, where it drew a great deal of interest. Mr. Thacker has written me a great many fine things about it and lists it in his catalog. Though my stock consisted of smaller bulbs and some bulblets I had many fine blooms. I was disappointed because my absence from home during the month of August prevented my exhibiting the variety at the Portland regional show.

COMMERCIAL POSSIBILITIES.

A leading Portland florist greatly admired it and pronounced it better than Rose Ash—and flower shops here are well stocked with Rose Ash blooms in their season. A lady passing The Optical Shop saw a vase of Sacajawea blooms in the show window and came in to ask Dr. Pratt where they could be bought. She was disappointed to learn that there were no more in existence for she needed a quantity of blooms of just that color to work into a decorating scheme.

SOME NOTABLE POINTS.

"It is a good novelty, quite a tall grower, good flor-escence, and keeping qualities," says Mr. Davis. "It is the most unusual color I have ever seen in the Gladiolus, and the blooms are very large and wide open. Surely fine," writes G. W. Thacker.

Even my bulblet stock made blooms over five inches across.

The stems are willowy and strong, giving a graceful effect.

The color does not fade, but holds tenaciously to the last bud. It is not adversely affected by a hot sun.

It is a good propagator. One bulb, grown from No. 6 stock, had 381 bulblets and no unusual methods were used to produce this result. Bulblets germinate well.

MIXTURES:

I do not purposely grow mixtures. Lots 1 and 2 were bought for pure stock, but after seeing the results do not sell them that way. If you want them please do not ask me to mail them long distances without a substantial order from the named lists, because the prices asked would not pay postage and packing.

- LOT 1. MARSHAL FOCH—DR. VAN FLEET. Probably 90% Foch. Worth twice the price, per dozen \$.40
- LOT 2. ANNA EBERIUS, MRS. M. S. BURKE, MURIEL. Supposed to be BURKE;; bad guess. All good, though. Dozen25
- LOT 3. ODDS and ENDS. I will mix from good named sorts odds and ends for clearance. Dozen .25
